

## Metro will boost city's image: NVS

Special Correspondent

**HYDERABAD:** Lean management practices and lean construction methods are being applied for the Hyderabad Metro Rail project to help overcome traffic chaos on congested stretches so as to minimise inconvenience to road users.

Stating this, HMR Managing Director N.V.S. Reddy averred that the design of overhead Metro stations as cantilever stations was another engineering marvel and a fine example of lean construction.

Speaking at the inaugural of productivity week celebrations at BHEL, Ramachandrapuram, he said successful completion of the Metro project would add certainly value to Hyderabad.

He said adoption of lean work practices, design innovations and conversion from a simple transportation engineering project to a multipurpose socio-economic project had paid the dividends world over.

BHEL Executive Directors -- N. Ravi Chander and M.K. Sharma -- participated.
